

SAGAR

Engineer – Testing (R&D)

☎ +91 8618933495

✉ malagisagar25@gmail.com

📍 Bengaluru, Karnataka, India

PROFESSIONAL SUMMARY

Testing Engineer in the R&D department with 2+ years of experience in telecom power equipment and lithium-ion battery validation, reliability testing, and regulatory compliance. Experienced in testing and validation of SPV, SMPS, CCU, HUPS, DCPS, Smart Rack, inverter, and lithium-ion battery systems. Hands-on expertise in **EMI/EMC** testing based on CISPR 32 and IEC 61000-4 standards, along with environmental and reliability **QM333** Testing. Expertise in **TSEC** documentation of HUPS, Smart Rack and SMPS. Skilled in hardware Testing, BMS functional testing, fault analysis, and certification support including compliance. Proven ability to ensure product reliability, regulatory compliance, and optimized performance through systematic testing and analysis.

CORE COMPETENCIES

- Environmental & Reliability Testing (QM333)
- EMI/EMC Compliance (CISPR 32, IEC 61000-4)
- High Voltage testing, Insulation Testing and trouble shooting
- Analysing SLD (Single Line Diagram) and Electrical Wiring
- Technical Documentation & Test Reporting
- Good in Performance testing
- Functional Validation & Testing
- Burn-in test with 50° Temperature
- Lithium-ion Battery Testing, Cell Balancing and Voltage monitoring
- BMS (Battery Management System) Testing

PROFESSIONAL EXPERIENCE

Engineer – (R&D) Testing

Lineage Power Pvt Ltd, Bengaluru

May 2023 – Present

- Executed functional and compliance testing for 5 telecom power systems (SPV, SMPS, HUPS, Battery, Smart Rack), ensuring 100% adherence to CISPR 32 and IEC 61000-4 standards.
- Execute High Voltage, Insulation Resistance, and Burn-in testing procedures.
- Validated Lithium-ion battery systems including cell balancing and BMS functional testing and monitoring cell temp, improving performance reliability by identifying and resolving voltage imbalance issues.
- Conducting Performance testing using Oscilloscope, Data Acquisition Unit, Psophometer, Electronic Load, Clamp Meter, and Digital Multi meter.
- Analyse Single Line Diagrams (SLDs), control wiring, and power wiring configurations.
- TESC certification processes including QM333 and regulatory compliance EMI/EMC.
- Contribute to internal test documentation, validation reports, and compliance records.

PROJECT

- Monitoring Body Temperature and Face Mask Detection using Arduino & ESP-32 CAM.

INTERNSHIP

Automation and IoT Training

GTTC (Government Tool Room and Training Centre), Kalaburagi

- Gained practical exposure to industrial automation systems and IoT-based applications.

EDUCATION

- B. Tech – Electronics and Communication Engineering
Sharnbasva University, Kalaburagi
CGPA: 8.68 | Year: 2022
- PUC (12th)
Department of Pre-University, Karnataka
Percentage – 72.33% | Year: 2018
- SSLC KSEEB
Percentage – 73.28% | Year: 2016

TECHNICAL SKILLS

Testing & Measurement Tools: Oscilloscope, Data Acquisition Unit, Electronic Load, Clamp Meter, Multi meter

Compliance Standards: CISPR 32, IEC 61000-4, QM333

Programming & Tools: Core Java, Basic C Programming

Documentation: Test Reports, Compliance Documentation, TESC Documentation.

SOFT SKILLS

- Analytical Problem-Solving
- Strong Technical Documentation Skills
- Cross-functional Collaboration
- Adaptability & Continuous Learning
- Willingness for Field Assignments
- Communication and Presentation Skills

ADDITIONAL INFORMATION

Languages: Kannada, Hindi, English, Telugu

Willing to Relocate: Yes
